

DECAUVILLE 0-4-0T

1:19 SCALE • 45/32 mm GAUGE

AL87-211A DECAUVILLE

The Decauville 0-4-0 is produced in a limited production as a gas-fired model. The engine made entirely of brass and stainless steel. The model has a fully functional control cylinder with flat slide, a fully suspension chassis and suspension couplings. The boiler is equipped with a pressure gauge and water gauge glass. The cab roof lifts up and tilts sideways to give easy access to the cab interior.

The original of this locomotive ran on 600mm gauge and has been used in many countries.
