

PENNSYLVANIA RAILROAD E-6 CLASS 4-4-2

LIMITED PRODUCTION • 1:32 SCALE • 45 mm GAUGE

The E-6 class were the last 4-4-2 "Atlantic" type locomotives built by the Pennsylvania Railroad. A total of 83 were constructed between 1910 and 1914. These modern design Atlantics featured a large and free-steaming boiler, outside Walschaert valve gear, piston valves on the cylinders, and a cast steel KW pattern trailing truck designed by the PRR's Chief Mechanical Engineer, William F. Keisel Jr. Although replaced by larger K-4 class Pacifics on most top-rated trains, the E-6s remained popular on lesser services, especially commuter operations around the New Jersey seashore routes. Nine were transferred to the Pennsylvania-Reading Seashore Lines; some were also leased to PRR subsidiary Long Island Rail Road.

Accucraft Trains is excited to announce upcoming production of the E-6 in 1:32 scale live steam and electric. Our models will faithfully reproduce the impressive characteristics found on these big 80" derived Atlantics. The model was developed with the assistance of David Fletcher and Jason Kovac. Production is limited.

SPECIFICATIONS

Scale	1:32
Gauge	45 mm
Mini. radius	30 in.
Construction	Brass & stainless steel
Electric Model	
Power	Pittman 0~24V DC motor
Features	Full cab interior design
	Constant lighting
	Sound ready
Live Steam Model	
Power	Live steam, alcohol/butane fired
Boiler	Copper
Valve Gear	Walschaerts valve gear
Working pressure	60 psi
Features	Safety valve
	Pressure gauge
	Water level glass
	Lubricator
	Blow down valve
	Throttle valve
	Axle driven pump w/ bypass valve
Hand operated water pump in tender
